

Immunoassay Controls

Discover a full range of quality control products for your reproductive and prenatal testing needs

Bio-Rad offers a comprehensive quality control solution for today's reproductive health and prenatal testing

An estimated 48.5 million couples worldwide are unable to conceive a child after five years of trying to become pregnant.¹ In the United States, the quality of reproductive health testing has never been more important. The Center for Disease Control reports that an estimated 7.3 million women use fertility services, indicating that infertility is a developing concern.² Bio-Rad can help alleviate that concern by providing reliable monitoring of fertility testing.

Bio-Rad quality controls cover a comprehensive menu of analytes designed to fit your reproductive health and fertility testing needs. For greater confidence in reliability of patient test results, manage your QC data and access peer group comparisons with our Unity Interlaboratory Program.

Reproductive Health Quality Controls

Liquichek AMH Control

A liquid, assayed quality control serum with clinically significant levels for monitoring ovarian reserve test procedures. Choose an ideal quality control solution for your clinic or laboratory.

- Liquid convenience to reduce handling errors
- Three levels targeted at low, medium and high clinically-relevant ranges
- Access to the Unity Interlaboratory Program, powerful and reliable quality control data management
- Human base to more closely resemble a patient sample
- 26 month shelf life at -20°C to -70°C
- 14 day open-vial stability at 2-8°C

Analyte

Anti-Mullerian Hormone

Lyphochek Fertility Control

- Designed to monitor the precision of tests performed for fertility or pregnancy
- Elevated hCG and hCG-β Subunit levels allow laboratories to monitor their dilution procedure
- Human serum based
- 3 year shelf life at 2-8°C
- 7 day reconstituted stability at 2-8°C

POCT Methods Listed

Analytes

Alphafetoprotein (AFP)

Digitoxin

hCG-β Subunit

Estradiol Estriol (Free) LH

Estriol (Total)*

Progesterone Testosterone

Ferritin **FSH**

*No claims are made regarding

performance or stability.

Liquichek Immunoassay Plus Control

- Offers a vast array of popular routine immunoassay analytes
- Assigned values are available for all major automated analyzers
- Provides a highly efficient solution for laboratories that focus on routine tests
- Liquid, human serum based
- 2 year shelf life at -20°C to -70°C
- 14 day open-vial stability at 2-8°C for most analytes

POCT Methods Listed

Analytes

For Reproductive Health Testing

Androstenedione **DHEA Sulfate** Estradiol **FSH**

LH

Progesterone

Prolactin

SHBG (Sex Hormone Binding Globulin) Testosterone

Prenatal Testing Quality Controls

Liquichek Maternal Serum II Control

- Liquid, assayed quality control serum
- Analytes at clinically significant levels to monitor the precision of maternal serum analysis
- Human serum
- Includes the hormone Inhibin A
- Very elevated hCG
- Very low levels of Free Estriol and AFP

Analytes

AFP hCG Free Estriol Inhibin A

Liquichek Maternal Serum 1st Trimester Control

- Liquid, assayed quality control
- Designed to monitor the precision of immunoassay test methods used during maternal serum first trimester screening
- Includes clinically relevant levels of Free β-hCG and PAPP-A
- Human serum based
- 2 year shelf life at -20°C to -70°C
- 15 day open-vial stability at 2-8°C

Available outside the United States only.

Analytes

hCG hCG-β Subunit (Free) PAPP-A

Unity QC Data Management Solutions

Bio-Rad Quality Controls are part of the Unity Program with its industry-leading features for benchmarking laboratory performance.

- Benefit from peer data generated from more than 50,000 instruments worldwide
- Utilize real-time access to peer group comparisons to help troubleshooting
- Consolidate your entire laboratory into one system
- Facilitate run-time decisions with optimized Westgard rules
- Ease compliance with ISO 15189 using simple tools to review rule violations and document corrective actions
- Define your own quality requirements and track key quality performance indicators

You can consolidate your entire laboratory into one QC system through our Unity Program. This sophisticated software includes best-in-class tools to support releasing results, benchmarking laboratory performance, and designing your QC system.

Unity Software Solutions

Contact your local sales representative for more information about our range of QC Data Management Solutions

Unity Real Time

Expert QC Data Management Solution for Desktop or Online Users

- Facilitate CLIA and ISO 15189 compliance
- Improve real-time bench and supervisor QC data review
- Implement best QC rules when used with Westgard Advisor
- Run validation with comprehensive audit trails
- Advanced charts and reports for data analysis
- Reduce non-essential retests with Analytical Goal options
- Upload QC data points from an LIS, middleware or instrument (optional)
- RiLiBÄK Advisor module available to comply with German regulations
