SECTION 1: IDENTIFICATION OF PRODUCT (MIXTURE) AND SUPPLIER

Product Name: GS HIV-1 Western Blot

Product Number: 32508 (40 tests)

Catalog number(s) for replacement components that can be obtained for use with this kit, and which are covered by this SDS include: 32574 (refer to Section 2).

Intended Use: The GS HIV-1 Western Blot Kit is an in vitro qualitative assay for the detection and identification of antibodies to Human Immunodeficiency Virus Type 1 (HIV-1) in human serum, plasma or dried blood spots. It is intended for use with persons of unknown risk as an additional, more specific test on human serum, plasma or dried blood spot specimens found to be repeatedly reactive using a screening procedure, such as Enzyme-Linked Immunosorbent Assay (ELISA), and as an additional, more specific test for use with serum, plasma or dried blood spot specimens obtained from subjects found to be reactive using rapid HIV-1 tests. For in vitro diagnostic use.

Manufactured by: Bio-Rad Laboratories, Inc.

Address: 6565 185th Avenue NE
             Redmond, WA 98052-5039, USA

Website: www.bio-rad.com

Phone Number: 1-800-2-BIORAD (1-800-224-6723); or 1-425-881-8300 (daytime PT)

SDS e-mail contact: ro-sds@bio-rad.com

Technical Information Contacts:

Bio-Rad provides a toll free line for technical assistance, available 24 hours a day, 7 days a week. In the United States of America and Puerto Rico, call toll free 1-800-2-BIORAD (1-800-224-6723). Outside the U.S.A., please contact your regional Bio-Rad office for assistance. Refer to section 16 for non-US local Bio-Rad agent contact information.

Emergency Phone Number: This SDS is listed with CHEMTREC 1-800-424-9300 (US) / 001-703-527-3887 (international – can be called collect). Use only in the event of a CHEMICAL EMERGENCY involving a SPILL, LEAK, FIRE, EXPLOSION or ACCIDENT with this product.

SECTION 2: HAZARDS IDENTIFICATION – HAZARDOUS COMPONENTS

This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Specific warnings are given in the instructions for use. The absence of a specific warning should not be interpreted as an indication of safety. The following information is furnished for those product hazardous constituents that require regulatory control or disclosure at the concentration found in the product. Refer to Section 16 for the full text of any solely abbreviated or coded hazard statements provided below and for the Key / legend to abbreviations and acronyms.

### C1. HIV-1 Western Blot Low Positive Control
- Heat inactivated Human serum / plasma containing antibodies reactive to HIV-1.
- Non-reactive for HBsAg and antibody to HCV.
- Preserved with **0.5% ProClin 300** (0.015% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9. GHS US HCS EC CLP Classification: WARNING; GHS07; H317; P280; P302 + P352, P333 + P313; P501.
- Preserved with **0.1% sodium azide** [NaN₃], CAS# 26628-22-8 and EC No 247-852-1. Not subject to GHS, US HCS, EC CLP and analogous global GHS-based regulatory requirements without Cat 5 Acute Toxic designations in this product mixture and concentration.

### C2. HIV-1 Western Blot High Positive Control
- Heat inactivated Human serum / plasma containing antibodies reactive to HIV-1.
- Non-reactive for HBsAg and antibody to HCV.
- Preserved with **0.5% ProClin 300** (0.015% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9. GHS US HCS EC CLP Classification: WARNING; GHS07; H317; P280; P302 + P352, P333 + P313; P501.
- Preserved with **0.1% sodium azide** [NaN₃], CAS# 26628-22-8 and EC No 247-852-1. Not subject to GHS, US HCS, EC CLP and analogous global GHS-based regulatory requirements without Cat 5 Acute Toxic designations in this product mixture and concentration.

### R2. Western Blot Specimen Diluent/Wash (5X)
- Tris buffered saline solution with milk proteins, **Tween 20** [C₈H₁₄O₃], CAS# 9005-64-5, EC No 585-580-06-X and dilute (≤ 0.2%) **EDTA**, disodium salt, dihydrate, CAS# 6381-92-6, EC No 205-358-3. Not subject to GHS, US HCS, EC CLP and analogous global GHS-based regulatory requirements in this product mixture and concentration.
- Preserved with **0.5% ProClin 300** (0.015% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9. GHS US HCS EC CLP Classification: WARNING; GHS07; H317; P280; P302 + P352, P333 + P313; P501.

### R3. HIV-1 Western Blot Conjugate
- Anti-human IgG, IgA and IgM (Goat) alkaline phosphatase conjugated solution with protein stabilizers.
- Preserved with **0.5% ProClin 300** (0.015% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9. GHS US HCS EC CLP Classification: WARNING; GHS07; H317; P280; P302 + P352, P333 + P313; P501.
- Preserved with **0.1% sodium azide** [NaN₃], CAS# 26628-22-8 and EC No 247-852-1. Not subject to GHS, US HCS, EC CLP and analogous global GHS-based regulatory requirements without Cat 5 Acute Toxic designations in this product mixture and concentration.

### R4. Western Blot Color Development Reagent
- 5-bromo-4-chloro-3-indolyl phosphate (BCIP) with ≤ 0.5% nitro blue tetrazolium (NBT) in an organic base/tris buffer with ≤ 5% 1,2-propanediol, CAS# 57-55-6, EC No 200-338-0 [pH 9.3]. Not subject to GHS, US HCS, EC CLP and analogous global GHS-based regulatory requirements in this product mixture and concentration.

### Disposables
- Disposable Reaction Trays
- 8 trays

*Replacement component catalog numbers are provided in this column whenever available.*
Markings according to the United Nations (UN) Globally Harmonized System (GHS), United States Hazard Communication Standard (US HCS), European Community (EC) 2008/1272/EC (EC CLP) guidelines and analogous GHS-based global regulations: This product has been conservatively classified and labeled in accordance with applicable United Nations (UN) GHS, United States Hazard Communication Standard (US HCS), related European Community (EC) 2008/1272/EC (EC CLP) guidelines and applicable analogous GHS-based global regulations. The following regulated hazardous chemical concentrations are found in product component(s):

Component R1 - 0.1% ProClin 300 and Component C0, C1, C2, R2, R3 - 0.5% ProClin 300 [≤ 0.015%. active ingredients – reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one (C₄H₄ClNOS; CAS# 26172-55-4, EC No 247-500-7) and 2-methyl-2H - isothiazol-3-one (C₄H₅NOS; CAS# 2682-20-4, EC No 220-239-6) (3:1)], EC Index No 613-167-00-5 with CAS# 55965-84-9.

Comprehensive GHS Based Classification: Skin Sensitizer Category 1

Label(s):

Signal Word: WARNING

Label Hazard Statements:

H317 May cause an allergic skin reaction.

Precautionary Statements (statements for product intended use and as codified on the product label):

P280 Wear protective gloves / protective clothing / eye protection / face protection.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P333 + P313 If skin irritation or rash occurs: Get medical advice/ attention.
P501 Dispose of contents and container in accordance to local, regional, national and international regulations.

Supplemental Precautionary Statements (additional precautions to consider relative to specific customer use):

P261 Avoid breathing mist / vapors/vapours / spray.
P272 Contaminated work clothing should not be allowed out of the workplace.

[Source: Raw Material vendor SDS, CCOHS databases and regulatory research]

NOTE: 0.1% Sodium Azide concentration falls under the UN GHS Cat 5 Acute Toxic which is not recognized in much of the world. [Acute toxic Cat. 5 rating would be: Warning; H303, H313; P312].

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

The following information is furnished for those hazardous constituents that require regulatory control or disclosure regardless of the concentration found in the product. Note that the information here is often based on data from the chemical raw material safety data sheet and literature (LD₅₀, exposure limits, etc.) Chemical constituents that do not require regulatory disclosure are not generally included here. This product contains a significantly diluted concentration in an aqueous solution, thus the assessment below has not considered the dilution reduction effect on the hazard. That hazard communication information is provided in Section 2 above. Some components were tested at the concentration found in the kit. In that case, the assessment is provided for the chemical dilution tested and the tested concentration will be provided at the beginning of the Chemical Ingredient Data/Information box. Refer to section 16 for the full text of any Comprehensive GHS-based Classification statements coded below, for the list of sources utilized in the assessment and for the Key / legend to abbreviations and acronyms.
Chemical Ingredient: **Propylene glycol**

Chemical concentrations found in this product: \( \leq 5\% \) in R4

Biological Ingredient Data / Information

<table>
<thead>
<tr>
<th>Biological Ingredient</th>
<th>Data / Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>NP-40 Inactivated HIV-1 virus</td>
<td>NP-40 Inactivated Human Immunodeficiency Virus, type 1 (HIV-1) virus, though verified to be non-infectious, should be handled as if capable of transmitting infectious disease, with Universal Precautions in a Biosafety Level 2 lab, applying the guidelines from the current CDC/NIH Biosafety in Microbiological and Biomedical Laboratories or WHO Laboratory Biosafety Manual. Employ aseptic technique for personal protection and to avoid product contamination; use of a Biosafety Cabinet (BSC) may be warranted or desired in certain situations. Avoid splashing, spills and the generation of aerosols. Secure in secondary containment with proper biohazard labeling. Do not inhale mists or aerosols; avoid contact with skin, eyes, mucous membranes and clothing. In case of contact with eyes, immediately rinse with copious water and seek medical attention. Employ decontamination procedures, with appropriate decon agent/disinfectant (typically a 1:10 dilution of household bleach, 70-80% ethanol or isopropanol, an iodophor like 0.5% Wescodyne Plus (EPA Reg. #4959-16), an o-phenylphenol/amyphenol such as 0.8% Vesphene (EPA Reg. #1043-87), or equivalent) before discarding any materials utilized or returning equipment used to general use. Dispose of this material in accordance with local, regional, national and international regulations. Handle appropriately with the requisite Good Laboratory Practices, Standard and Universal Precautions.</td>
</tr>
<tr>
<td>Human Serum [reactive and non-reactive in C0, C1, C2]</td>
<td>The human sera in the components were tested and found non-reactive for HBsAg and antibodies to HCV (Component C0 is also negative for antibodies to HIV1/2). No known test method can offer complete assurance that HIV, hepatitis B or C virus or other infectious agents are absent. Employ Standard and Universal Precautions when handling these reagents and all human blood, specimens or patient samples, which represent an unknown, heightened hazard. Handle as if capable of transmitting infectious disease, in a Biosafety Level 2 lab, applying the guidelines from the current CDC/NIH Biosafety in Microbiological and Biomedical Laboratories or WHO Laboratory Biosafety Manual. Avoid splashing, spills and the generation of aerosols. Secure in secondary containment with proper biohazard labeling. Do not inhale mists or aerosols; avoid contact with skin, eyes, mucous membranes and clothing. In case of contact with eyes, immediately rinse with copious water and seek medical attention. Employ decontamination procedures, with appropriate decon agent/disinfectant (typically a 1:10 dilution of household bleach, 70-80% ethanol or isopropanol, an iodophor like 0.5% Wescodyne Plus (EPA Reg. #4959-16), an o-phenylphenol/amyphenol such as 0.8% Vesphene (EPA Reg. #1043-87), or equivalent) before discarding any materials utilized or returning equipment to general use. Dispose of this material in accordance with local, regional, national and international regulations. Handle appropriately with the requisite Good Laboratory Practices, Standard and Universal Precautions. Persons handling blood samples should have the option of receiving hepatitis B vaccination.</td>
</tr>
<tr>
<td>Animal proteins, [≤ 10% v/v in component R3]</td>
<td>This material is of animal origin (bovine and goat) and may be a potential contact irritant. Hazard Unknown. Handle as potentially infectious. The chemical, physical and toxicological properties have not been thoroughly investigated. Handle appropriately with the requisite Good Laboratory Practices, Standard and Universal Precautions. Dispose of in accordance with local, regional, national and international regulations.</td>
</tr>
</tbody>
</table>

NA: Not Applicable

NE: Not Established or Unknown (unable to locate data); typically for concentrate form unless otherwise specified.
Related product information:

- Refer to Section 16 for the full text of any Comprehensive GHS-based Classification statements coded above.
- Refer to Section 16 for the list of sources utilized in the assessment and the Key / legend to abbreviations and acronyms.
- No significant adverse health effects are expected by any route for the following chemical constituents in the kit volumes and concentrations present [chemical or dilution is not subject to GHS, US HCS, EC CLP or other GHS-based hazard labeling]:
  - EDTA disodium salt, dihydrate \((\text{C}_{10}\text{H}_{12}\text{N}_{2}\text{O}_{8}\text{Na}_{4}\cdot 2\text{H}_{2}\text{O})\), CAS# 6381-92-6, EC No 200-573-9 \([\leq 0.2\% \text{ w/v, in component R2}].\)
  - Tween 20 \((\text{C}_{38}\text{H}_{114}\text{O}_{26})\) CAS# 9005-64-5, EC No 585-580-06-X \([\leq 2.5\% \text{ v/v in component R2}].\)
  - 5-bromo-4chloro-3indolyl phosphate (BCIP) with \(\leq 0.5\% \text{ nitro blue tetrazolium (NBT) in an organic base/Tris buffer [component R4].}\)
  - The miscellaneous salts, buffers, protein-stabilizers, antibodies, conjugates, water, and other chemicals found in the conjugated-antibody solution with protein stabilizers, and Tris buffered saline solution with milk proteins.
- According to the concept of Universal Precautions (29 CFR 1910.1030), all human blood and certain human body fluids must be treated as if known to be infectious for HIV, HBV and other bloodborne pathogens. No known test method can offer complete assurance that the products derived from human blood will not transmit infection; thus, they should be handled as though they contain an infectious agent. Furthermore, individual patient samples being tested represent a heightened, unknown hazard. Aerosolization/inhalation, contact and mucous membrane exposure should be avoided during sample and kit handling. Consider equipment that potentially comes in contact with human source material as contaminated until appropriately decontaminated.
- Do not eat, drink or smoke when using this product.
- Wear protective gloves/protective clothing/eye protection/face protection. Take off contaminated clothing and wash before reuse.

SECTION 4: EMERGENCY FIRST AID MEASURES

<table>
<thead>
<tr>
<th>Health Effects:</th>
<th>Symptoms of overexposure may include headache, dizziness and congestion. May cause allergic skin reaction upon repeated exposure, generally at concentrations and volumes that greatly exceed that of this kit.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eye Contact:</td>
<td>Flush eyes with copious water for at least 15 minutes. Ensure adequate flushing by separating the eyelids with fingers while flushing with water. OBTAIN MEDICAL ATTENTION.</td>
</tr>
<tr>
<td>Skin Contact:</td>
<td>Remove contaminated clothing. Flush skin with copious water and wash affected area with soap and water. If blood-to-blood contact occurs, or if more severe symptoms develop, consult a physician.</td>
</tr>
<tr>
<td>Inhalation:</td>
<td>Remove person from exposure area to fresh air. Generally, this aqueous product is not a significant inhalation hazard in the kit volumes and concentrations. Treat symptomatically and supportively.</td>
</tr>
<tr>
<td>If Swallowed:</td>
<td>If ingested, rinse out mouth thoroughly with water, provided the person is conscious, and OBTAIN MEDICAL ATTENTION. Call a physician or the local poison control center. Treat symptomatically and supportively. If vomiting occurs, keep head lower than hips to prevent aspiration.</td>
</tr>
<tr>
<td>Notes to Physician:</td>
<td>According to the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030), Universal Precautions apply. Persons handling human blood samples should be offered hepatitis B vaccination prior to working with human source material.</td>
</tr>
</tbody>
</table>

SECTION 5: FIREFIGHTING MEASURES

<table>
<thead>
<tr>
<th>Extinguishing Media:</th>
<th>Use extinguishing media appropriate for the surrounding fire.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous Decomposition Products:</td>
<td>Oxides of carbon or nitrogen may form when heated to decomposition.</td>
</tr>
<tr>
<td>Special Firefighting Procedures:</td>
<td>Conventional firefighting full protective equipment (with NIOSH-approved self-contained breathing apparatus) and procedures appropriate for the surrounding fire should be sufficient.</td>
</tr>
</tbody>
</table>
SECTION 6: ACCIDENTAL RELEASE MEASURES

- Avoid direct contact with skin, eyes, mucous membranes and clothing by wearing appropriate lab personal protective equipment (PPE) including gloves, lab coat and eye/face protection.
- In the event of a hazardous material spill, contain the spill if it is safe to do so and immediately move to a safe area, free from potential aerosols, to decontaminate and/or safely remove any contaminated clothing, as necessary. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. Isolate the hazard area and ventilate if appropriate. Ensure that appropriate spill cleanup materials and PPE are available and used.
- Prevent material from entering sewers, waterways or confined spaces.
- Follow established laboratory policy and applicable CDC/NIH biosafety and/or OSHA/WISHA hazardous material spill and/or NFPA/Fire Code guidelines for appropriate hazardous chemical and/or biological material spill response and cleanup. Avoid release to the environment.
- Wear appropriate PPE. Immediately, and on-site if possible: Decontaminate Biohazard/Human Source Material spills, which should always be treated as potentially infectious, including the area, spill materials and any contaminated surfaces or equipment. Utilize an appropriate chemical decon agent/disinfectant that is effective for the known or potential pathogens relative to the samples involved (commonly a 1:10 dilution of bleach, 70-80% ethanol or isopropanol, an iodophor (such as Wescodyne Plus) or a phenolic, etc.).
- Clean the spill area with water and wipe dry. Spills can also be absorbed with an appropriate inert material (e.g. spill pillows, acid absorbent pads, etc.) which is secured in an appropriate, labeled, sealed container. Material used to absorb the spill may require hazardous material waste disposal. Infectious, chemical and laboratory wastes must be handled and discarded in accordance with all local, regional, national and international regulations. Avoid direct contact with skin, eyes, mucous membranes and clothing by wearing appropriate lab personal protective equipment (PPE), including gloves, lab coat and eye/face protection.
- Refer to Sections 8 and 13 for more specifics.

SECTION 7: HANDLING AND STORAGE INFORMATION

| Handling: | This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Follow proper Good Laboratory Practices and safety guidelines for handling chemical, biological and laboratory hazards. Do not smoke, eat, or drink in areas where patient samples and kit reagents are handled. Wash your hands after use. Wear appropriate personal protective equipment (PPE) including gloves, lab coat or equivalent and eye/face protection. Keep containers tightly closed; avoid splashing, spills and the generation of aerosols. Handle all human source materials, specimens and equipment used to perform the operations as though they were capable of transmitting infectious disease, as per Standard and Universal Precautions. All personal protective equipment should be removed before leaving the work area. Refer to Section 8 for more specifics. Avoid release to the environment. Do not allow undiluted product hazardous chemical ingredient or large quantities of it to reach ground water or water course. Consult with your Environmental Health & Safety Office for assistance. |
| Storage: | Store according to product and label instructions (generally at 2-8°C). Caution, consult accompanying documents. Read and follow all the Precautions and Warnings in the kit product instructions. Refer to the Instructions For Use / Package Insert for additional product information. For in vitro diagnostic use. |
SECTION 8: EXPOSURE CONTROL / PERSONAL PROTECTION MEASURES (8):

Control Parameters – Component chemicals with limit values that require monitoring at the workplace: The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

Additional information: The lists that were valid during the creation were used as basis.

The following personal protective equipment (PPE) is recommended to prevent blood or other potentially infectious or hazardous materials from reaching the user's work or street clothes, skin, mouth, mucous membranes and eyes, or hazard inhalation, under normal conditions of use and for the time during which the protective equipment is utilized:

<table>
<thead>
<tr>
<th>PPE</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Ventilation</strong></td>
<td>Adequate lab ventilation is required. It is recommended that users handle potentially infectious human source material/patient samples in a biological safety cabinet (BSC), expressly if aerosols might be generated.</td>
</tr>
<tr>
<td><strong>Eye / Face Protection</strong></td>
<td>Wear ANSI approved safety glasses, goggles or face shield with safety glasses or goggles. Contact lenses should not be worn when handling lab hazards.</td>
</tr>
</tbody>
</table>
### Protective Gloves:
Suitable gloves must be worn at all times when handling kit reagents or patient samples to provide skin protection from splash and intermittent contact. Synthetic gloves, such as nitrile, neoprene and vinyl, are recommended because they are sturdy, effective and contain no natural latex ingredients associated with latex glove allergic reactions. Disposable (single use) gloves should be changed often and never reused. Wash hands thoroughly after removing gloves.

### Protective Clothing:
Wear a lab coat, clinic jacket, gown, apron and/or smock. Disposable clothing is strongly recommended when handling biohazardous material. If reusable clothing is used, procedures for handling potentially infectious laundry under the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030) are required.

### Respiratory Protection:
Do not breathe mist / vapors/vapours / spray.

### Other:
All personal protective equipment should be removed before leaving the work area and placed in an appropriately designated area or container for storage, processing, decontamination or disposal. Protective coverings such as plastic wrap, aluminum foil, or imperviously-backed absorbent pads used to cover equipment and/or surfaces must be removed and replaced if they become overtly contaminated.

### SECTION 9: PHYSICAL AND CHEMICAL CHARACTERISTICS

<table>
<thead>
<tr>
<th>Property</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appearance</td>
<td>Variable, generally aqueous liquids. Exceptions are the solid Western Blot Strips and disposable reaction trays.</td>
</tr>
<tr>
<td>Odor/odour</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>pH</td>
<td>The liquid chemical components are between pH 5 and 9.</td>
</tr>
<tr>
<td>Boiling point</td>
<td>Undetermined</td>
</tr>
<tr>
<td>Melting Point</td>
<td>Undetermined</td>
</tr>
<tr>
<td>Flash point</td>
<td>Not Applicable.</td>
</tr>
<tr>
<td>Flammable limits: LEL/LFL</td>
<td>Not applicable; UEL/UFL is Not applicable.</td>
</tr>
<tr>
<td>Evaporation rate</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Fire hazard</td>
<td>Although the components have not been tested for fire hazard and explosion data, being water-based, they are not expected to be fire hazards, but some of the kit packaging materials may burn under fire conditions.</td>
</tr>
<tr>
<td>Vapor/vapour Pressure</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Vapor/vapour Density</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Relative density</td>
<td>Not Established.</td>
</tr>
<tr>
<td>Solubility</td>
<td>The liquid chemical components are soluble in water.</td>
</tr>
<tr>
<td>Partition coefficient (n-octanol/water):</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Auto igniting</td>
<td>Product is not known to be self-igniting.</td>
</tr>
<tr>
<td>Decomposition temperature</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Viscosity</td>
<td>No applicable information was found.</td>
</tr>
<tr>
<td>Danger of explosion</td>
<td>Sodium azide may react with lead or copper plumbing to form highly explosive metal azides; build-up in metal plumbing has led to laboratory explosions, so flush with copious water when pouring dilute solutions down the drain to prevent such explosive build-up.</td>
</tr>
</tbody>
</table>

No other standard characteristics applicable to the identification or hazards of the product are known.
SECTION 10: STABILITY AND REACTIVITY INFORMATION

NOTE: Chemical reactions that could result in a hazardous situation (e.g. generation of flammable or toxic chemicals, fire or detonation) are listed here. Although not intended to be complete, an overview of important reactions involving common chemicals is provided to assist in the development of safe work practices.

| Chemical Stability / Reactivity: | Components are stable with no known inherent significant reactivity, except the acidic solutions, which may have an exothermic reaction with certain chemicals, particularly strong bases and reducing agents. |
| Conditions and/or Materials to Avoid: | Sodium azide may react with lead or copper plumbing to form highly explosive metal azides; buildup in metal plumbing has led to laboratory explosions, so flush with copious water when pouring dilute solutions down the drain to prevent such explosive buildup. |
| Hazardous Decomposition Products: | Oxides of carbon or nitrogen may form when heated to decomposition. |
| Hazardous Polymerization: | Has not been reported to occur. |

SECTION 11: TOXICOLOGICAL INFORMATION -- GENERAL COMPOSITE

Refer to Sections 2 and 3 for the kit component concentrations. The composite toxicological information for this product is:

**Acute Health Effects**

- **Acute Toxicity:** May be detrimental if enough is ingested (typically in quantities above those found in the kit).
- **Primary Irritant Effect:** May slightly irritate eyes or skin, depending on amount and contact time.
- **Serious Eye Damage / Irritation:** May slightly irritate eyes depending on amount and contact time.
- **STOT-Single Exposure:** No applicable information was found.
- **Aspiration Hazard:** No applicable information was found.
- **Other Acute Health Effects:** No significant other acute health effect known.

**Biohazard Potential**

Inactivated HIV virus, though verified to be non-infectious, should be handled with Standard and Universal Precautions, as if capable of transmitting infectious disease. The human sera in the components was tested and found non-reactive for HBsAg and antibodies to HCV (Component C0 is also negative for antibodies to HIV 1/2). No known test method can offer complete assurance that HIV, hepatitis B or C virus or other infectious agents are absent. Moreover, patient blood samples tested with this kit represent an unknown, heightened hazard. Employ Standard and Universal Precautions; handle these reagents, all human blood and specimens as if capable of transmitting infectious disease, in a Biosafety Level 2 laboratory, applying the guidelines from the current CDC/NIH Biosafety in Microbiological and Biomedical Laboratories, the WHO Laboratory Biosafety Manual or equivalent. Persons handling blood samples should have the option of receiving hepatitis B vaccination.

**Chronic Toxicity**

- **Respiratory or Skin Sensitization:** May cause an allergic skin reaction. Contains a small volume of a very dilute, sensitizing preservative (ProClin 300); though the potential for an allergic response is greatly reduced by the dilution, sensitization threshold is unknown, thus handle accordingly.
- **Carcinogenicity:** No carcinogenic effect known. No component, mixture or constituent has been classified as a carcinogen by NTP, IARC or OSHA.
- **Germ Cell Mutagenicity:** No applicable information was found.
- **Reproductive hazard:** No reproductive toxic effect known.
- **STOT-Repeated Exposure:** Data is not available.

**Additional Toxicological Information:** To the best of our knowledge, the chemical, physical and toxicological properties have NOT been thoroughly investigated for some of the component chemicals and/or mixtures.
SECTION 12: ECOLOGICAL INFORMATION

This product was not tested. The following assessment is based on information for the ingredients.

<table>
<thead>
<tr>
<th>Ecotoxicity: 100% Sodium Azide [CAS# 26628-22-8] *:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fish LC₅₀ - Lepomis macrochirus - 0.68 mg/l - 96 h</td>

</tr>
<tr>
<td>*Source: Raw Material Vendor Safety Data Sheet, RTECS and/or CCOHS Cheminfo</td>
</tr>
</tbody>
</table>

Persistence and degradability: No information found.
Bioaccumulation potential: No information found.
Mobility in soil: No information found.
PBT and vPvB assessment: No information found.
Other adverse effects: An environmental hazard cannot be excluded in the event of unprofessional handling or disposal.

Avoid release to the environment.
General notes: Water hazard class 1 (Self-assessment): slightly hazardous for water.

SECTION 13: DISPOSAL CONSIDERATIONS

Disposal of hazardous and/or laboratory wastes, product or packaging must be conducted in accordance with all applicable local, regional, national and international regulations. This section specifies the general and United States RCRA requirements. Processing, use or contamination of the kit components may change waste management requirements and options. Contact your Environmental Health & Safety Office for your specific disposal procedures.

Recommended Product Disposal:
- Sodium azide may react with lead or copper plumbing to form highly explosive metal azides; buildup in metal plumbing has led to laboratory explosions, so flush with copious water when pouring dilute solutions down the drain to prevent such explosive buildup; check your applicable ordinances accordingly.
- All human source and other potentially infectious material must be appropriately decontaminated or disposed of as infectious material; check your international, national, regional and local ordinances accordingly.

Do not allow undiluted product or large quantities of it to reach ground water or water course.

Recommended Unclean Packaging Disposal: Dispose in accordance with all applicable local, regional, national and international regulations.

SECTION 14: TRANSPORT INFORMATION

Shipping of product, packaging and waste must be conducted in accordance with all applicable local, regional, national and international regulations. Processing, use or contamination of the kit components may change shipping requirements and options. Contact your Environmental Health & Safety Office for your specific shipping procedures.

Recommended Unused Product Multi-Modal Transportation: According to US DOT, IATA and UN “Model Regulations”, the product must be transported as follows: No known transport restrictions.

Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code: Not applicable.

SECTION 15: REGULATORY INFORMATION

Composite HMIS Rating: Health: 2 Flammability: 0 Reactivity: 0

Carcinogenicity Categories: No component, mixture or constituent has been classified as a carcinogen by NTP (National Toxicity Program), IARC (International Agency for Research on Cancer), TLV-CAR (Threshold Limit Value established by ACGIH) or OSHA (Occupational Health and Safety Administration).
National Regulations – Other Domestic / Foreign Laws:

**Hazard communication compliance** – This SDS contains the required information for preparation in accordance with the following GHS-based global regulations:

2. **Taiwan** – Regulation Lao-An-3-Tzu-No. 0960145703 / Published National Standard CNS 15030
3. **People’s Republic of China** – National Standard GB/T 17519-2013, GB 30000-2013
   - Composite HSNO Hazard Class: Subclass 6.5 Category B (contact sensitizers)
5. **Mexico** – Standard NMX-R-019-SCFI-2011
7. **Japan** – Industrial Safety and Health Law (ISHL) National Standard JIS Z7252, JIS Z7253
   - Composite WHMIS Hazards: Skin Sensitization
10. **Brazil** – Regulation NRB 14725
11. **Australia** – Code of Practice *Preparation of Safety Data Sheets for Hazardous Chemicals* under Section 274 of the *Work Health and Safety* (WHS) Act.
12. Analogous GHS-based global regulations

* A “Yes” indicates that all components of this product comply with the inventory requirements administered by the governing country(s)

**Regulation (EC) No. 1907/2006 (REACH):**

*Chemicals included in the Candidate List of Substances of Very High Concern (SVHC):* None

**REACH No.:** A registration number is not available for this substance as the substance or its uses are exempted from registration, the annual tonnage does not require a registration or the registration is envisaged for a later registration deadline.

**United States SARA:**

*SARA 302 (extremely hazardous substance) components:*
The following components are subject to reporting levels established by SARA Title III, Section 302 in greater quantities than found in this product: *Sodium Azide*, CAS-No. 26628-22-8; Revision Date: 2007-07-01.

*SARA 313 components:*
This material does not contain any chemical components with known CAS numbers that exceed the threshold (De Minimis) reporting levels established by SARA Title III, Section 313.

**California Proposition 65:** The Product does not contain listed substances.
Hazard statement abbreviation(s):

- Acute Tox. – oral. Acute toxicity – ingested (swallowed)
- Acute Tox. – skn. Acute toxicity – skin contact (dermal)
- Skin Sens. Skin sensitisation
- Skin Corr. Skin corrosion
- Eye Damage. Serious eye damage
- Aquatic Acute Acute aquatic toxicity
- Aquatic Chronic Chronic aquatic toxicity
- Cat. Category

H300 + H310 Fatal if swallowed or in contact with skin.
H302 Harmful if swallowed
H314 Causes severe skin burns and eye damage.
H317 May cause an allergic skin reaction.
H410 Very toxic to aquatic life with long lasting effects.

P261 Avoid breathing mist / vapors/vapours / spray.
P264 Wash skin thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P272 Contaminated work clothing should not be allowed out of the workplace.
P273 Avoid release to the environment.
P279 Wear protective gloves/ protective clothing/ eye protection/ face protection.
P301 + P312 + P330 IF SWALLOWED: Call a POISON CENTER or doctor/ physician if you feel unwell. Rinse mouth.
P301 + P330 + P331 IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
P302 + P350 IF ON SKIN: Gently wash with plenty of soap and water.
P302 + P352 IF ON SKIN: Wash with plenty of soap and water.
P303 + P361 + P338 IF ON SKIN (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/shower.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P310 Immediately call a POISON CENTER or doctor/physician.
P333 + P313 If skin irritation or rash occurs: Get medical advice/attention.
P363 Wash contaminated clothing before reuse.
P391 Collect spillage.
P405 Store locked up.
P501 Dispose of this material and its container to hazardous or special waste collection point.
Caution Contains human source material. Handle as if capable of transmitting potentially infectious agents (Standard and Universal Precautions).

This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Specific warnings are given in the instructions for use. The absence of a specific warning should not be interpreted as an indication of safety.

For in vitro diagnostic use.

Chemical safety assessment: Mixtures covered in this SDS were classified using the US HCS, EC CLP and/or UN Globally Harmonized System of Classification and Labelling of Chemicals (GHS) Fourth edition unless otherwise specified.
