IDENTIFICATION OF PRODUCT (PREPARATION) AND SUPPLIER (1):

Product Name: GS HBsAg EIA 3.0
Product Number: 32591 (480 tests), 32592 (960 tests), 25258 (4800 tests)
Catalog number(s) for replacement, optional and separately purchased components that can be obtained for use with this kit, and which are covered by this MSDS include: 25103, 25104, 25108, 25109, 25110, 25260, 25261, 26181 and 26182 (refer to Section 2).

Intended Use: The GS HBsAg EIA 3.0 is a qualitative enzyme immunoassay (EIA) for the detection of Hepatitis B Surface Antigen (HBsAg) in human serum or plasma and also in cadaveric serum specimens. The HBsAg EIA 3.0 is intended to be used for screening blood and blood products intended for transfusion or for further manufacture into plasma products. The GS HBsAg EIA 3.0 is also intended for use with the Ortho Summit™ System (OSS) in the screening of blood donors.

Manufactured By: Bio-Rad Laboratories, Inc.
Address: 6565 185th Avenue NE
Redmond, WA 98052-5039, USA
Website: www.bio-rad.com
Phone Number: 1-800-2-BIORAD (1-800-224-6723); or 1-425-881-8300 (daytime PT)
Technical Information Contacts: Bio-Rad provides a toll free line for technical assistance; in the United States of America call toll free 1-800-2-BIORAD (1-800-224-6723). Outside the U.S.A., please contact your regional Bio-Rad office for assistance.
Emergency Phone Number: This MSDS is listed with CHEMTREC 1-800-424-9300 / 1-703-527-3887. Use only in the event of a CHEMICAL EMERGENCY involving a SPILL, LEAK, FIRE, EXPLOSION or ACCIDENT with this product.

HAZARDS IDENTIFICATION -- HAZARDOUS COMPONENTS (2):

This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Specific warnings are given in the instructions for use. The absence of a specific warning should not be interpreted as an indication of safety.

| **R2. Wash Solution Concentrate** (30X); 2, 3 or ** bottles (120 mL)**

Catalog No. 25261

- Normal human serum that is nonreactive for HBsAg, anti-HBsAg, and antibodies to HIV and HCV.
- Preserved with 0.005% gentamicin sulfate, CAS# 1405-41-0, EC No 215-778-9 [< 0.01% dilution is not subject to GHS and EU 2008/1272/EC labeling requirements.]
- Preserved with 0.16% ProClin 950, containing 0.016% active ingredient: 9.5-9.9% 2-methyl-4-isothiazolin-3-one (C148H114O26) [CAS# 9005-64-5, EC No 585-580-06-X]. [Not subject to GHS and EU 2008/1272/EC regulatory requirements.]

**C0. HBsAg Negative Control (Human), 1, 1 or 5 vial(s) (12 mL)**

Catalog No. 25108

- Normal human serum that is nonreactive for HBsAg, anti-HBsAg, and antibodies to HIV and HCV.
- Preserved with 0.005% gentamicin sulfate, CAS# 1405-41-0, EC No 215-778-9 [< 0.01% dilution is not subject to GHS and EU 2008/1272/EC labeling requirements.]
- Preserved with 0.1% ProClin 300 (0.003% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9 [GHS / 2008/1272/EC Classification: WARNING! GHS07; H317; P261, P272, P280; P312, P363, P302 + P352, P333 + P313; P501] [EU Classification per 2001/59/EC and 1999/45/EC: Irritant: Xi; R 43; S 24-35-37.]

**C1. HBsAg Positive Control (Human), 1, 1 or 5 vial(s) (8 mL)**

Catalog No. 25109

- Purified HBsAg (human ad and ay subtypes) in synthetic diluent.
- Preserved with 0.1% ProClin 300 (0.003% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9 [GHS / 2008/1272/EC Classification: WARNING! GHS07; H317; P261, P272, P280; P312, P363, P302 + P352, P333 + P313; P501] [EU Classification per 2001/59/EC and 1999/45/EC: Irritant: Xi; R 43; S 24-35-37.]

**C2. HBsAg Low Positive Control (Human), 1, 1 or 5 vial(s) (8 mL)**

Catalog No. 25110

- Purified HBsAg (human ad and ay subtypes) in synthetic diluent.
- Preserved with 0.1% ProClin 300 (0.003% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9 [GHS / 2008/1272/EC Classification: WARNING! GHS07; H317; P261, P272, P280; P312, P363, P302 + P352, P333 + P313; P501] [EU Classification per 2001/59/EC and 1999/45/EC: Irritant: Xi; R 43; S 24-35-37.]

**R4. HBsAg Conjugate Diluent**, 1, 1 or 5 bottle(s) (120 mL)

Catalog No. 25104

- Buffer with protein stabilizers, [pH neutral].
- Preserved with 0.005% Gentamicin sulfate, CAS# 1405-41-0 , EC No 215-778-9 [< 0.01% dilution is not subject to GHS and EU 2008/1272/EC labeling requirements.]
- Preserved with 0.5% ProClin 300 (0.015% active ingredient), EC Index No 613-167-00-5 with CAS# 55965-84-9 [GHS / 2008/1272/EC Classification: WARNING! GHS07; H317; P261, P272, P280; P312, P363, P302 + P352, P333 + P313; P501] [EU Classification per 2001/59/EC and 1999/45/EC: Irritant: Xi; R 43; S 24-35-37.]

**R8. Substrate Buffer**, 1, 1 or 5 bottle(s) (120 mL)

Catalog No. 26181

- Dilute citric acid/sodium acetate buffer, (pH ~ 4.0).
- < 0.1% hydrogen peroxide [H2O2], CAS# 7722-84-1, EC No 231-765-0.
- < 5% dimethylsulfoxide [DMSO - C2H6OS], CAS# 67-68-5, EC No 200-644-3. [Dilution is not subject to GHS and EU 2008/1272/EC regulatory requirements.]

**R9. Chromogen**, 1, 1 or 5 bottle(s) (12 mL)

Catalog No. 26182

- ≤ 0.04 N hydrochloric acid (~ 0.3% HCl, CAS# 7647-01-0, EC No 231-595-7) solution (pH ~ 1.5).
- ≤ 0.25% 3,3',5,5' tetramethylbenzidine dihydrochloride [TMB– C16H20N2•2HCl], CAS# 207738-08-7, EC No 264-769-6. [Dilution is not subject to GHS and EU 2008/1272/EC regulatory requirements.]

**R10. Stopping Solution**, 1, 1 or ** bottle (120 mL) **

Catalog No. 25260

- 1 N H2SO4 (4.4% w/w Sulfuric acid), CAS# 7664-93-9, EC No 231-639-5 (pH ≤ 2); severely irritating to skin, corrosive to eyes [GHS / 2008/1272/EC Classification: DANGER! GHS05; H314; P260, P264, P280; P310, P363, P301 + P330 + P311, P303 + P361 + P353, P304 + P340, P305 + P351 + P338; P405: P501.] [EU Classification per 1999/45/EC and 2001/60/EC: Corrosive: C; R 34 (eyes)-36/38-41; S 24/25-26-37/39-60.]

- Plate Sealers

- Clear plastic sealers.

*Replacement, optional and separately purchased component catalog numbers are provided in this column where available.

** Wash Solution Concentrate and Stopping Solution must be purchased separately for the 50-plate (4800 test) kit. Refer to catalog number 25261 for the Wash Solution Concentrate and catalog number 25260 for the Stopping Solution. These reagents are included in the 5-plate (480 test) and 10-plate (960 test) kits.
Markings according to the United Nations (UN) Globally Harmonized System (GHS) and European Community (EU) 2008/1272/EC guidelines:

This product has been conservatively classified and labeled in accordance with applicable United Nations (UN) GHS and related European Community (EC) 2008/1272/EC guidelines. The following regulated hazardous chemical concentrations are found in product component(s):

**Components C1, C2, R3 and R4:** 0.1% ProClin 300 or 0.5% ProClin 300 [0.003% or 0.015% active ingredients – reaction mass of: 5-chloro-2-methyl-4-isothiazolin-3-one (EC No 247-500-7) and 2-methyl-2H -isothiazol-3-one (EC No 220-239-6) (3:1)], EC Index No 613-167-00-5 with CAS# 55965-84-9.

**Components C0:** 0.16% ProClin 950 [<0.016% active ingredient: 9.5-9.9% 2-methyl-4-isothiazolin-3-one (C₄H₅NOS); CAS# 2682-20-4].

**GHS | 2008/1272/EC Classification:**

- **Label(s):** GHS07
- **Signal Word:** WARNING!
- **Label Hazard Statement:** H317: May cause an allergic skin reaction.
- **Supplemental Hazard Statement:** None Specified
- **Precautionary Statement – Prevention:** P261: Avoid breathing dust/ fume/ gas/mist/vapours/spray
  P272: Contaminated work clothing should not be allowed out of the workplace.
  P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.
- **Precautionary Statement – Response:** P312: Call a POISON CENTER or doctor/physician if you feel unwell.
  P363: Wash contaminated clothing before reuse.
  P333 + P313: If skin irritation or rash occurs: Get medical advice/ attention.
- **Precautionary Statement – Storage:** None Specified
- **Precautionary Statement – Disposal:** P501: Dispose of contents and container in accordance to local, regional, national and international regulations.

**Component R10:** 1N H₂SO₄ [4.4% w/w Sulfuric acid], CAS# 7664-93-9, EC No 231-639-5 (pH ≤ 2); severely irritating to skin, corrosive to eyes. [This STOP solution has been evaluated with the CORROSITEX® test method to determine its corrosive potential and classification. The results of this testing classified this STOP solution as Class: 8, Packing group II (UN2796)]

**GHS | 2008/1272/EC Classification:**

- **Label(s):** GHS05
- **Signal Word:** DANGER!
- **Label Hazard Statement:** H314: Causes severe skin burns and eye damage.
- **Supplemental Hazard Statement:** None Specified
- **Precautionary Statement – Prevention:** P260: Do not breathe dust/fume/ gas/mist/vapours/spray.
  P264: Wash thoroughly after handling.
  P280: Wear protective gloves/ protective clothing/ eye protection/ face protection.
- **Precautionary Statement – Response:** P310: Immediately call a POISON CENTER or doctor/ physician.
  P363: Wash contaminated clothing before reuse.
  P301 + P330 + P331: IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
  P303 + P361 + P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
  P304 + P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
  P305 + P351 + P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- **Precautionary Statement – Storage:** P405: Store locked up.
- **Precautionary Statement – Disposal:** P501: This material and its container must be disposed of as hazardous waste.
COMPOSITION/INFORMATION ON INGREDIENTS -- HAZARDOUS COMPONENTS (3):

The following information is furnished for those product hazardous constituents that require regulatory control or disclosure at the concentration found in the product. Note that the information here is often based on data for the chemical raw material (LD$_{50}$, exposure limits, etc.) and that the product contains a significantly diluted concentration in an aqueous solution; thus, the assessment below has taken hazard reduction processing into consideration when possible. The GHS and EU classification were made according to the latest editions and expanded upon from company and literature data. (Refer to the Key below)

Gentamicin sulfate is an antimicrobial toxin solution, which is considered a photosensitizer, is a known reproductive toxin and sensitizer, prolonged or repeated exposure may cause an allergic reaction in certain sensitive individuals. Gentamicin sulfate is known to the State of California to cause developmental toxicity, classified under the generic class of Aminoglycosides. The potential for adverse health effects is unknown for the highly diluted, small volume of gentamicin in this kit, but is unlikely if handled appropriately with the requisite Good Laboratory Practices and Universal Precautions. Dispose of this material in accordance with local, regional, national and international regulation.

</table>

The chemical, physical and toxicological properties have not been thoroughly investigated. At this concentration, this biocidal preservative is irritating to eyes and skin, and may be detrimental if enough is ingested (quantities above those found in the kit). ProClin300 is a skin sensitizer; prolonged or repeated exposure may cause allergic reaction in certain sensitive individuals. IF ON SKIN: Wash with plenty of soap and water. If skin irritation or rash occurs: Get medical advice/attention. Call a POISON CENTER or doctor/physician if you feel unwell. The potential for adverse health effects is unknown for the highly diluted, small volume of ProClin in this kit, but is unlikely if handled appropriately with the requisite Good Laboratory Practices and Universal Precautions. This material and its container must be disposed of in a safe way and in accordance with local, regional, national and international regulations. Note: The Potential trace residue of ProClin used as a production preservative for the microplate (R1) no longer requires EU labeling, however the sensitization threshold is unknown (R43; S36), so apply the above precautions accordingly.

**[This STOP solution has been evaluated with the CORROSITEX® test method to determine its corrosive potential and classification. The results of this testing classified this STOP solution as Class: 8, Packing group II (UN2796)]**  
**DANGER!**  
1.0 N Sulfuric acid (H₂SO₄) solutions are irritating to skin and severely irritating or corrosive to eyes, depending on the amount and length of exposure; greater exposures can cause eye damage, including permanent impairment of vision or blindness. Causes severe skin burns and eye damage. Wear protective gloves/protective clothing/eye protection/face protection. Do not breathe mist/vapours/spray. If exposed or if you feel unwell: Immediately call a POISON CENTER or doctor/physician. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. Immediately call a POISON CENTER or doctor/physician. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Keep away from strong bases and reducing agents. Store locked up. This material must be disposed of as hazardous acidic waste; it may be neutralized to pH 6-8 for disposal if trained and equipped to do so, however always dispose of acidic solutions as required by local, regional, national and international regulations. Handle appropriately with the requisite Good Laboratory Practices. |
| Human Serum  
[non-reactive in C0] | Human source material used in the preparation of the Negative Control (C0) has been tested and found nonreactive for Hepatitis B surface antigen (HBsAg), anti-HBsAg, and antibodies to Hepatitis C virus (HCV) and human immunodeficiency virus (HIV-1 and HIV-2). The human plasma derived viral antigen HBsAg subtypes ad and ay used in the preparation of the Positive Control (C1) and Low Positive Control (C2) are highly purified and heat treated. No known test method can offer complete assurance that HIV, hepatitis B or C virus or other infectious agents are absent. Moreover, patient blood samples tested with this kit represent an unknown, heightened hazard. Employ Universal Precautions when handling these reagents and all human blood or specimens. Handle as if capable of transmitting infectious disease, in a Biosafety Level 2 lab, applying the guidelines from the current CDC/NII Biosafety in Microbiological and Biomedical Laboratories. Avoid splashing, spills and the generation of aerosols. Secure in secondary containment with proper biohazard labeling. Do not inhale mists or aerosols; avoid contact with skin, eyes, mucous membranes and clothing. In case of contact with eyes, immediately rinse with copious water and seek medical attention. Employ decontamination procedures with appropriate decon agent or disinfectant (typically a 1:10 dilution of household bleach, 70-80% ethanol or isopropanol, an iodophor like 0.5% Wescodyne Plus (EPA Reg. #4959-16), an o-phenylphenol/amyphele such as 0.8% Vesphe (EPA Reg. #1043-87), or equiv.) before discarding any materials utilized or returning equipment used to general use. Dispose of this material in accordance with local, regional, national and international regulations. Handle appropriately with the requisite Good Laboratory Practices and Universal Precautions. Persons handling blood samples should have the option of receiving hepatitis B vaccination. |
Key:

+ The Kit Concentration was not tested; the values refer to the solution concentration as tested, designated by Percentage within parentheses.
++ The Kit Concentration was tested or the values given were estimated for the general diagnostic laboratory usage of the kit reagent dilution.
NE: Not Established or Unknown (unable to locate data); typically for concentrate form unless otherwise specified.

Abbreviations for component HMIS hazard ratings are as follows: H=Health, F=Flammability, R=Reactivity
GHS = Globally Harmonized System
RTECS # - Registry of Toxic Effects of Chemical Substances number
PEL - Permissible Exposure Limit / Occupational Exposure Limit (OEL)
TLV/TWA – Threshold Limit Value / Time-Weighted Average
STEL - Short Term Exposure Limit
IDLH - Immediately Dangerous to Life or Health

General Kit Composite Health Hazards:

♦ No significant adverse health effects are expected by any route for the following chemical constituents in the kit volumes and concentrations present:
  - **Tween 20** [C₅H₁₁₄O₂₆], CAS# 9005-64-5, ≤ 2% v/v in R2.
  - **Dimethyl sulfoxide** [DMSO - C₂H₆OS], CAS# 67-68-5, ≤ 5% v/v in R8.
  - **Dilute hydrogen peroxide** [H₂O₂], CAS# 7722-84-1, ≤ 0.1% v/v in R8.
  - The miscellaneous salts, sugars, buffers, water, animal sera (fetal bovine, goat, rabbit, etc.) and other chemicals found in the HRP conjugate, buffers with protein stabilizers, dyes and citric acid/sodium acetate solutions.

♦ Component R1 contains < 0.1% of **Cobalt (II) Chloride** [CAS# 7646-79-9, EC No. 231-589-4], which is classified as an IARC Group 2B (possible human carcinogen) and EU Category 2 carcinogen, and **silica quartz** [CAS# 14808-60-7, EC No. 238-87-4], which in dust form is classified as an ACGIH Class A2 (suspected human carcinogen) and IARC Group 1 (carcinogenic to humans). This material is in a pelletized desiccant sealed packet within the plate pouch, which is unlikely to generate significant dust under normal conditions of use and is thus not typically considered a health hazard. However, health hazards could result from dusts generated if the packet is cut, split or otherwise compromised and a significant number of pellets were crushed to a powder form. Keep the desiccant packet intact as received in the microwell plate component package.

♦ According to the concept of Universal Precautions (29 CFR 1910.1030), all human blood and certain human body fluids must be treated as if known to be infectious for HIV, HBV and other bloodborne pathogens. No known test method can offer complete assurance that products derived from human blood will not transmit infection; thus, they should be handled as though they contain infectious agents. Furthermore, individual patient samples being tested represent a heightened, unknown hazard. Aerosolization/inhalation, contact and mucous membrane exposure should be avoided during sample and kit handling. Consider equipment that potentially comes in contact with human source material as contaminated until appropriately decontaminated.

---

**EMERGENCY FIRST AID MEASURES (4):**

**Health Effects:** Symptoms of overexposure may include headache, dizziness, congestion and breathing difficulty. May be toxic to developing fetus, generally at concentrations and volumes that greatly exceed that of this kit. Skin contact may result in dermatitis and may cause allergic skin reaction upon repeated exposure. Causes severe skin burns and eye damage. Severely irritating or corrosive to eyes; greater exposures can cause eye damage, including permanent impairment of vision. May cause ingestion corrosive effects, including burning throat, mouth and stomach.

**Eye Contact:** Flush eyes with copious water for at least 15 minutes. Ensure adequate flushing by separating the eyelids with fingers while flushing with water. OBTAIN MEDICAL ATTENTION.

**Skin Contact:** Remove contaminated clothing. Flush skin with copious water and wash affected area with soap and water. If blood-to-blood contact occurs or if more severe symptoms develop, consult a physician.

**Inhalation:** Remove person from exposure area to fresh air. If breathing becomes difficult, immediately call for emergency medical assistance. Treat symptomatically and supportively. Generally, this aqueous product is not a significant inhalation hazard in the kit volumes and concentrations present.
If Swallowed: If ingested, wash out mouth thoroughly with water, provided the person is conscious, and OBTAIN MEDICAL ATTENTION. Call a physician or the local poison control center. Treat symptomatically and supportively. If vomiting occurs, keep head lower than hips to prevent aspiration.

Notes to Physician: According to the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030), Universal Precautions apply. Persons handling human blood samples should be offered hepatitis B vaccination prior to working with human source material.

**FIREFIGHTING MEASURES (5):**

Extinguishing Media: Use extinguishing media appropriate for the surrounding fire.

Special Firefighting Procedures: Conventional firefighting full protective equipment (with NIOSH-approved self-contained breathing apparatus) and procedures appropriate for the surrounding fire should be sufficient.

**ACCIDENTAL RELEASE MEASURES (6):**

- Avoid direct contact with skin, eyes, mucous membranes and clothing by wearing appropriate lab personal protective equipment (PPE) including gloves, lab coat and eye/face protection.
- In the event of a hazardous material spill, contain the spill if it is safe to do so, and immediately move to a safe area, free from potential aerosols, to decontaminate and/or safely remove any contaminated clothing, as necessary. Isolate the hazard area and ventilate if appropriate. Ensure that appropriate spill cleanup materials and PPE are available and used. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
- Follow established laboratory policy and applicable CDC/NIH biosafety and/or OSHA/WISHA hazardous material spill and/or NFPA/Fire Code guidelines for appropriate hazardous chemical and/or biological material spill response and cleanup. Avoid release to the environment.
- Wear appropriate PPE. Immediately, and on-site if possible:
  - Decontaminate biohazard/human source material spills, which should always be treated as potentially infectious, including the area, spill materials and any contaminated surfaces or equipment, with an appropriate chemical disinfectant that is effective for the known or potential pathogens relative to the samples involved (commonly a 1:10 dilution of bleach, 70-80% ethanol or isopropanol, an iodophor (such as Wescodyne Plus) or a phenolic, etc.).
  - Neutralize corrosive acid spills immediately with the appropriate Acid neutralization / adsorbent product.
- Clean the spill area with water and wipe dry. Spills can also be absorbed with appropriate inert materials (e.g., spill pillows, absorbent pads, etc.) which are secured in an appropriate, labeled, sealed container. Material used to absorb the spill may require hazardous material waste disposal. Infectious, chemical and laboratory wastes must be handled and discarded in accordance with all local, regional, national and international regulations.

**HANDLING AND STORAGE INFORMATION (7):**

Handling: This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Follow proper Good Laboratory Practices and safety guidelines for handling chemical, biological and laboratory hazards. Wear appropriate personal protective equipment (PPE) including gloves, lab coat or equivalent and eye/face protection. Keep containers tightly closed; avoid splashing, spills and the generation of aerosols. Handle all human source specimens, materials and equipment used to perform the operations as though they were capable of transmitting infectious disease, as per Universal Precautions. Refer to Section 8 for more specifics. Consult with your Environmental Health & Safety Office for assistance.

Storage: Store according to product and label instructions (generally at 2-8°C or at ambient temperature (15-30°C)).

Read and follow all the Precautions and Warnings in the kit product instructions. Refer to the Instructions For Use / Package Insert for additional product information.
EXPOSURE CONTROL / PERSONAL PROTECTION MEASURES (8):

Additional information: The lists that were valid during the creation were used as basis.

The following personal protective equipment (PPE) is recommended to prevent blood or other potentially infectious or hazardous materials from reaching the user's work or street clothes, skin, mouth, mucous membranes and eyes under normal conditions of use and for the time during which the protective equipment is utilized:

- **Ventilation:** Adequate lab ventilation is required. It is recommended that users handle potentially infectious human source material/patient samples in a biological safety cabinet (BSC), especially if aerosols might be generated.
- **Respiratory Protection:** Do not breathe mist / vapours / spray.
Eye Protection: Wear ANSI approved safety glasses, goggles or face shield with safety glasses or goggles. Contact lenses should not be worn.

Protective Gloves: Suitable gloves must be worn at all times when handling kit reagents or patient samples to provide skin protection from splash and intermittent contact. Synthetic gloves such as nitrile, neoprene and vinyl are recommended because they are sturdy, effective and contain no natural latex ingredients associated with latex glove allergic reactions. Disposable (single use) gloves should be changed often and never reused. Wash hands thoroughly after removing gloves.

Protective Clothing: Wear a lab coat, clinic jacket, gown, apron and/or smock. Disposable clothing is strongly recommended when handling biohazardous material. If reusable clothing is used, procedures for handling potentially infectious laundry under the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030) are required.

Other: All personal protective equipment should be removed before leaving the work area and placed in an appropriately designated area or container for storage, processing, decontamination or disposal. Protective coverings such as plastic wrap, aluminum foil or imperviously backed absorbent pads used to cover equipment and/or surfaces must be removed and replaced if they become overtly contaminated.

Notes: Occupational exposure limit values and health hazard data were given in Section 3. Environmental controls are included in the following sections.

PHYSICAL AND CHEMICAL PROPERTIES (9):

Appearance: Variable, generally aqueous liquids. Exceptions are the solid microtiter plate and related materials.

pH: Most of the liquid chemical components are between pH 6 and 8, Exceptions are the following acidic solutions:

- Substrate Buffer at pH ~4
- Stopping Solution at pH ≤ 2
- Chromogen at pH ~1.5

Boiling Point: Not Established.

Flash Point: Not Applicable.

Fire Hazard: Although the components have not been tested for fire hazard and explosion data, being water-based, they are not expected to be fire hazards, but some of the kit packaging materials may burn under fire conditions.

Auto Igniting: Product is not self-igniting.

Danger of Explosion: Generally, the product is not known to present an explosion hazard; however, the small amount of glycerol in component R3 should be kept away from strong oxidizing agents, including sodium hypochlorite (bleach) and potassium permanganate, as these could potentially form explosive mixtures.

Specific gravity: Approximately 1-2.

Solubility: The liquid chemical components are soluble in water. The acidic solutions may release heat.

No other standard characteristics are known to be applicable to the identification or hazards of the kit components.

STABILITY AND REACTIVITY INFORMATION (10):

NOTE: Chemical reactions that could result in a hazardous situation (e.g. generation of flammable or toxic chemicals, fire or detonation) are listed here. Although not intended to be complete, an overview of important reactions involving common chemicals is provided to assist in the development of safe work practices.

Stability: Components are stable with no known inherent significant reactivity, except the acidic solutions, which may have an exothermic reaction with certain chemicals, particularly strong bases and reducing agents.

Conditions to Avoid: None known when used as intended.

Materials to Avoid: Do not allow the acidic solutions to come in contact with strong bases, oxidizing agents and metals. Keep glycerol solutions away from strong oxidizing agents, including sodium hypochlorite (bleach) and potassium permanganate, as these could potentially form explosive mixtures.
Hazardous Decomposition Products: May release toxic oxides of carbon, nitrogen and sulfur or hydrogen chloride gas.
Hazardous Polymerization: Has not been reported to occur.

<tr>
<th>TOXICOLOGICAL INFORMATION -- GENERAL COMPOSITE (11):</th>
</tr>
</thead>
<tbody>
<tr>
<td>Refer to Sections 2 and 3 for the kit component concentrations. The composite toxicological information for this product is:</td>
</tr>
<tr>
<td><strong>Acute Health Effects</strong></td>
</tr>
<tr>
<td><strong>Toxicity:</strong> May be detrimental in contact with skin, if swallowed, and to eyes upon contact; in case of contact with eyes, immediately rinse with copious water and seek medical attention. Harmful to eyes upon contact; in case of contact with eyes, immediately rinse with copious water and seek medical attention.</td>
</tr>
<tr>
<td><strong>Primary Irritant Effects:</strong> Irritating to skin and severely irritating or corrosive to eyes, and with greater exposures can cause eye damage, including permanent impairment of vision or blindness.</td>
</tr>
<tr>
<td><strong>Corrosivity:</strong> Destructive to tissue of the skin, respiratory tract, mucous membranes, and eyes. Harmful or lethal if swallowed. Severely corrosive to eyes; contact can cause eye damage, including permanent impairment of vision or blindness.</td>
</tr>
<tr>
<td><strong>Other Acute Health Effects:</strong> Risk of serious damage to eyes.</td>
</tr>
<tr>
<td><strong>Biohazard Potential</strong></td>
</tr>
<tr>
<td>The Human source material in the components of this product were tested and found non-reactive for hepatitis B surface antigen (HBsAg) and antibodies to hepatitis C virus (HCV) and human immunodeficiency virus (HIV-1 and HIV-2). No known test method can offer complete assurance that HIV, hepatitis B or C virus or other infectious agents are absent. Moreover, patient blood samples tested with this kit represent an unknown, heightened hazard. Employ Universal Precautions; handle these reagents, all human blood and specimens as if capable of transmitting infectious disease, in a Biosafety Level 2 laboratory, applying the guidelines from the current CDC/NIH <em>Biosafety in Microbiological and Biomedical Laboratories</em> or equivalent. Persons handling blood samples should have the option of receiving hepatitis B vaccination.</td>
</tr>
<tr>
<td><strong>Chronic Toxicity</strong></td>
</tr>
<tr>
<td><strong>Sensitization:</strong> Contains a small volume of very dilute, potentially skin-contact sensitizing preservatives, ProClin and Gentamicin sulfate (an antimicrobial biocide that is also a photosensitizer); prolonged or repeated exposure may cause allergic reaction in certain sensitive individuals. Though the potential for an allergic response is greatly reduced by the dilution, sensitization threshold is unknown; thus handle accordingly.</td>
</tr>
<tr>
<td><strong>Carcinogenicity:</strong> Component R1 contains &lt; 0.1% Cobalt (II) chloride (CAS# 7646-79-9, IARC class 2B and EU Category 2 carcinogen) and silica quartz (CAS# 14808-60-7, ACGIH class A2 and IARC class 1 carcinogen). Keep the desiccant packet intact as received in the component package.</td>
</tr>
<tr>
<td><strong>Reproductive hazard:</strong> Reasonably anticipated to be a reproductive toxin. May cause harm to unborn child. Gentamicin sulfate is known to the State of California to cause developmental toxicity (teratogen), classified under the generic class of aminoglycosides. (Designation is for concentrated gentamicin sulfate, which is diluted to 0.005% in kit components.)</td>
</tr>
<tr>
<td><strong>Additional Toxicological information:</strong> To the best of our knowledge the chemical, physical and toxicological properties have NOT been thoroughly investigated for some of the component chemicals and/or mixtures.</td>
</tr>

</table>
Disposal of hazardous and/or laboratory wastes, product or packaging must be conducted in accordance with all applicable local, regional, national and international regulations. This section specifies the general and United States RCRA requirements. Processing, use or contamination of the kit components may change waste management requirements and options. Contact your Environmental Health & Safety Office for your specific disposal procedures.

**Recommended Product Disposal:**
- All **Human source** and other potentially infectious material must be appropriately decontaminated or disposed of as infectious material; check your applicable ordinances accordingly.
- **Acidic Stopping Solution** (sulfuric acid, pH ≤ 2), **Chromogen** (pH ~ 1.5), and **Substrate Buffer** (pH ~ 4.0) wastes should be neutralized to pH 6-8 for safe sewer disposal; check your applicable ordinances accordingly. If the final pH measures ≤ 2, it requires disposal as a corrosive material in an RCRA approved dangerous waste facility (or equivalent). The US RCRA Waste Disposal Code for this waste, if not neutralized, is D002; check your applicable ordinances accordingly.

**Recommended Unclean Packaging Disposal:** Dispose of in accordance with all applicable local, regional, national and international regulations.

**TRANSPORT INFORMATION (14):**

Shipping and disposal of product, packaging and waste must be conducted in accordance with all applicable local, regional, national and international regulations. Processing, use or contamination of the kit components may change shipping requirements and options. Contact your Environmental Health & Safety Office for your specific shipping procedures.

**Recommended Unused Product Transportation:** According to US DOT and IATA, the kit must be transported as follows:
- **Acidic Component Stopping Solution** in this kit contains 1N sulfuric acid; thus, any un-neutralized discarded kit component or waste generated from its use resulting in a corrosive liquid (pH ≤ 2 or pH ≥ 12.5 per Method 9040 [USEPA Publication SW-846] or Corrodes Steel [NACE Standard TM-01-69]) must be transported as follows:
  - Proper Shipping name: **Sulphuric acid [with not more than 51% acid]**
  - DOT Class: 8
  - Packing group II
  - DOT ID Number: UN 2796

**Recommended Used Product Disposal Transportation:** Air and land transportation information for discarded kit components and waste from this product when used as intended is:
- The acidic **Chromogen** is at pH ~1.5 and the 1N sulfuric acid **Stopping Solution** is at pH ≤ 2; thus, any un-neutralized discarded kit component or waste generated from its use resulting in a corrosive liquid (pH ≤ 2 per Method 9040 [USEPA Publication SW-846] or Corrodes Steel [NACE Standard TM-01-69]), must be transported as follows:
  - Proper Shipping name: **Corrosive Liquid n.o.s.**
  - DOT Class: 8
  - Packing group III
  - DOT ID Number: UN 1760

**REGULATORY INFORMATION (15):**

Carcinogenicity Categories:

**Component R1** contains less than 0.1% Cobalt (II) chloride (CAS# 7646-79-9, IARC class 2B and EU Category 2 carcinogen) and silica quartz (CAS# 14808-60-7, in dust form is an ACGIH class A2 and IARC class 1 carcinogen) in a pelletized desiccant sealed packet. Keep the desiccant packet intact as received in the microwell plate component package.

**Component R10** contains Sulfuric Acid, CAS# 7664-93-9, IARC Group 1, The agent is Carcinogenic to Humans, NTP listed as Known to be a Human Carcinogen and ACGIH-TLV Group A2, Suspected Human Carcinogen. Note: The IARC Group and ACGIH A2 classifications refers specifically to sulfuric acid contained in strong inorganic acid mists are and does not apply to sulfuric acid or sulfuric acid solutions.

**WHMIS Classification:** This MSDS contains the required information in accordance with the WHMIS hazard classification criteria for this product.

- Composite WHMIS Hazard Class: Class D2B (Material Causing Other Toxic Effects) Class E (Corrosive Material)

**Markings according to European Community 1999/45/EC, 2001/59/EC, 2001/60/EC, 2006/102/EC guidelines:** This product has been classified and labeled in accordance with applicable European Community (EC) Directives (refer to 1999/45/EC, 2001/59/EC, 2001/60/EC and 2006/102/EC).

- **Hazard Designation of Composite Product:** CORROSIVE: C  
  IRRITANT: Xi

**Hazard Determining Substance(s) of Labeling:** (rated under 1999/45/EC unless otherwise specified):
- **0.5% or 0.1% ProClin 300**, per 2001/59/EC: Index No: 613-167-00-5 with CAS# 55965-84-9 [Irritant: Xi; R 43; S 24-35-37 (< 0.06% and > 0.0015% Active Ingredient).]
- **0.16% ProClin 950**, CAS# 2682-20-4 [Irritant: Xi, R 36/38-43; S 24/25-35-36/37 (0.63% - 0.052% Active Ingredient).]
- **1N sulfuric acid** (H$_2$SO$_4$) [pH ≤ 2], CAS# 7664-93-9, EC No 231-639-5 [Corrosive: C; R 34 (eyes) 36/38-41; S 24/25-26-36/37/39-60 (1999/45/EC and 2001/60/EC)].

**OTHER INFORMATION (16):**

**Risk Phrases:**
- R 34 Causes burns.
- R 36/38 Irritating to eyes and skin.
- R 41 Risk of serious damage to eyes.
- R 43 May cause sensitization by skin contact.
- Caution Contains human source material. Handle as if capable of transmitting infectious agents (Universal Precautions).

**Safety Phrases:**
- S 24 Avoid contact with skin.
- S 24/25 Avoid contact with skin and eyes.
- S 26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- S 35 This material and its container must be disposed of in a safe way.
- S 36/37 Wear suitable protective clothing and gloves.
- S 36/37/39 Wear suitable protective clothing, gloves and eye/face protection.
- S 37 Wear suitable gloves.
- S 56 Dispose of this material and its container to hazardous or special waste collection point.
- S 60 This material and/or its container must be disposed of as hazardous waste.

This test kit should be handled only by qualified personnel trained in laboratory procedures and familiar with their potential hazards. Warnings are given in the instructions for use. The absence of a specific warning should not be interpreted as an indication of safety.
For in vitro diagnostic use.

Additional information: The lists that were valid during the creation were used as basis.

This Revision: Reviewed existing information and made minor updates.
