

UriSelect™ 4 Medium

Inoculation and Incubation

10 µL calibrated loop

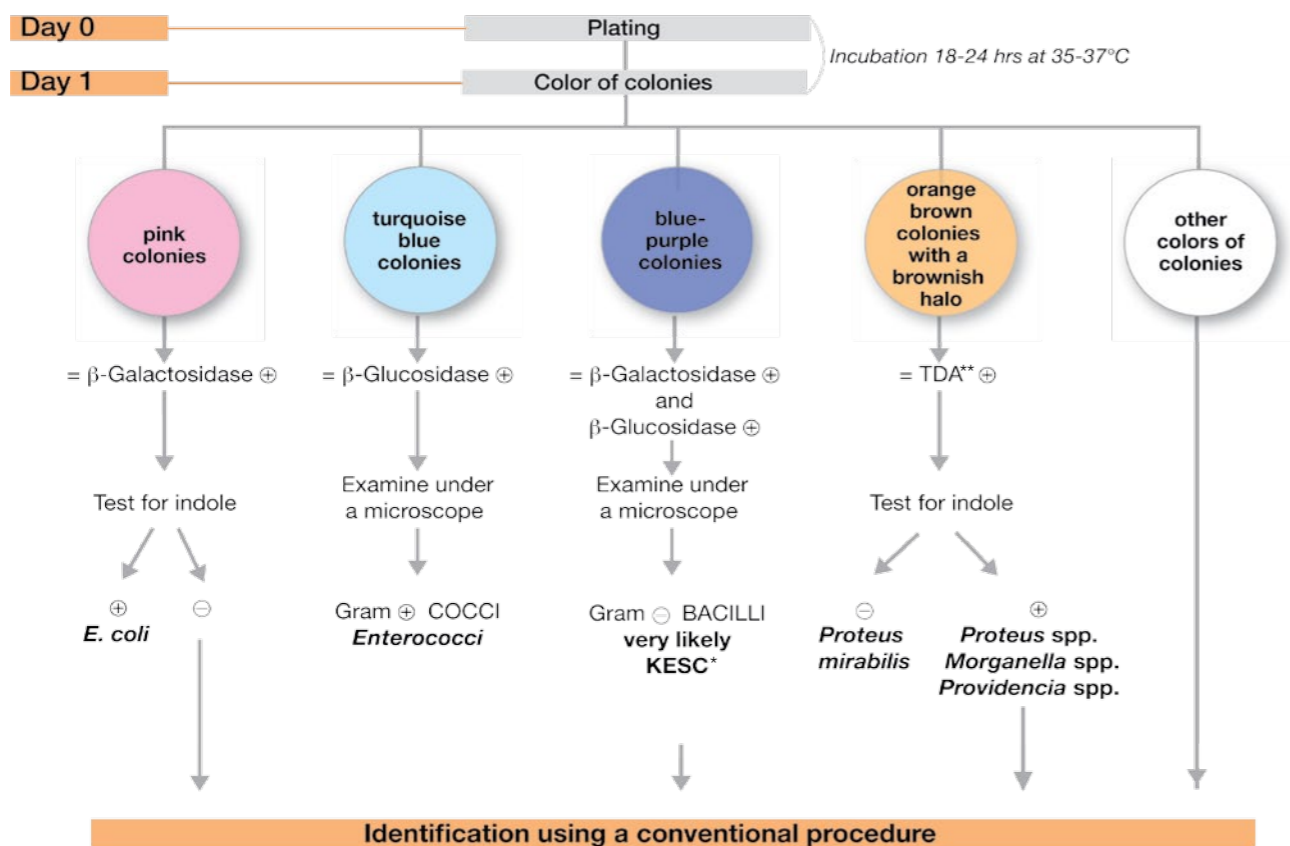

Bacterial Count

Number of bacteria/ mL urine

Interpretation

* *Klebsiella, Enterobacter, Serratia and Citrobacter*
 ** Tryptophan Deaminase

Ordering Information

Catalog No.	Description
63726	UriSelect™ 4 Medium..... 20 x 90 mm

UriSelect™ 4 Medium

UriSelect™ 4 Medium

Isolation and Enumeration of Urinary Pathogens

Immediate Identification

Escherichia coli

Enterococcus spp.

Proteus mirabilis

Optimal Visualization of Mixed Cultures

E.g.: *E. coli* and *E. faecium*

Opaque background to enhance contrast and intensity of color

E.g.: *E. coli*, *E. faecalis* and *P. mirabilis*

Presumptive Identification:

Possible colony colors/morphology - Conventional identification required

Klebsiella pneumoniae

Enterobacter cloacae

Serratia marcescens

Citrobacter koseri

Examples of other growth - Conventional identification required

Staphylococcus saprophyticus

Staphylococcus epidermidis

Staphylococcus aureus

Streptococcus agalactiae

Pseudomonas aeruginosa

Acinetobacter baumannii

Candida albicans
