Unpacking and Installing the CFX Duet System

The CFX Duet System is packed in a single box with the accessories included in the box. The accessories kit includes the power cord, USB cable, shipping screw plug, and an Ethernet cable. Set the box on the benchtop and follow the instructions per the labels affixed to the shipping box. For more detailed instructions, refer to the instrument guide. The CFX Duet System requires a connected PC running the most current version of CFX Maestro Software to operate.

Unpacking the CFX Duet System

1. Remove the straps from the shipping box. DO NOT cut the top of the box open. Go to step 2 to continue unpacking the instrument.
2. Pinch and pull out the clips. After pulling out the four clips, lift up the outer box to expose the instrument.
3. Pull down for tray access.
4. Slide tray to pull out the instrument.

Removal of the Shipping Screw

1. Use the supplied power cord to plug the CFX Duet System into an appropriate electrical outlet.

2. Turn on the CFX Duet System using the power switch located on the right-hand side on the back of the instrument.

3. Ensure the CFX Duet System is connected via the USB cable to a PC running CFX Maestro Software.

4. In CFX Maestro Software, confirm that the CFX Duet System icon appears in the Detected Instruments pane.

5. In the Detected Instruments pane of CFX Maestro Software, right click the CFX Duet System icon and select Properties.

6. Select the Shipping Screw tab and click Remove Shipping Screw.

7. Follow the instructions displayed in the CFX Maestro Software window to remove the shipping screw, which is located on the right-hand side of the instrument.

Operating the CFX Duet System

Operating the CFX Duet System requires connection to a PC running CFX Maestro Software. For details, see the user guide for CFX Maestro Software. For details about the CFX Duet System, refer to the instrument guide (10000148048).
