
D-10 Dual Program HbA2/F/A1c

Diabetes and Hemoglobinopathy Testing in One Kit

For diabetes testing, the Short A1c Program can be selected to detect HbA1c and report a calibrated result in just 3 minutes. If you want to see the whole picture with better variant resolution, you can select the 6.5-minute Extended HbA2/F/A1c Program. HbA1c is reportable in the presence of HbAS, HbAD, HbAE, HbAC.

The Extended HbA2/F/A1c Program is also the method of choice for β-thalassemia testing and hemoglobin variant detection. HbA1c, HbF, and HbA2 results are calibrated for better accuracy. Traceability and calibration uncertainty are certified.

D-10 Dual Reagent Kit

Flexible

- 400 HbA1c tests or 200 HbA2/F/A1c tests
- 3-minute Short A1c Program
- 6.5-minute Extended HbA2/F/A1c Program
- Fast switching between Short and Extended Programs
- Reliable β-thalassemia testing
- Simultaneous quantitative HbA2, HbF, and HbA1c determination
- Accurate HbA2 results with improved resolution from HbS
- Detection of common hemoglobin variants HbS, HbC, HbD, HbE

Accurate and Precise HbA1c

- NGSP certified
- Traceable to the IFCC reference method
- Excellent precision, high resolution, and accurate results in the presence of hemoglobin variants
