

The Future of Extended Phenotyping Is Here

100% Monoclonal.
100% Ready to Use.

New monoclonal ID-cards are here to make extended phenotyping easy. By eliminating the need for add-on antisera and incubation, they speed up your workflow and simplify the way you test.

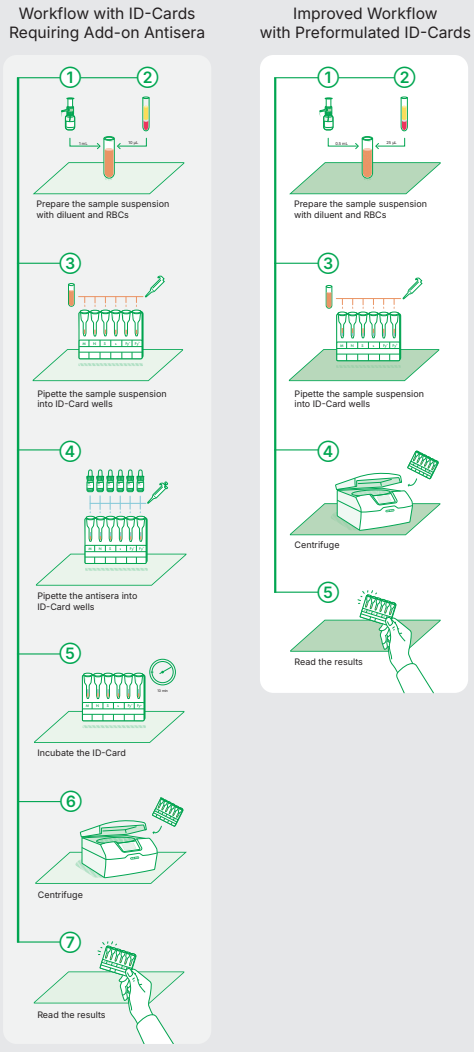

- Fully preformulated, with no add-on antisera required
- Improved quality, improved reactions
- Reduced turnaround time with fewer pipetting and incubation steps

---

Highlights of the Lineup:

DiaClon Anti-k
DiaClon Anti-N
DiaClon Anti-Kp^a
DiaClon Anti-Kp^b
DiaClon Anti-S
DiaClon Anti-s

Preformulated ID-Cards Simplify Your Workflow
