IH-A\textsuperscript{b}ID Integrated Antibody Identification Software
IH-AbID

Integrated Antibody Identification Software

IH-AbID software simplifies the labour intensive and complex process of antibody identification.

Enhance efficiency with an integrated identification specialist.

- Result entry
- Single well interpretation
- Fully integrated with IH-Com
- Request additional tests
- Automated antibody identification
- Reagent management
Eliminate Errors

- Automates the manual technique of antibody identification
- Antibodies classified by probability

Automate Procedures

- Upload of Antigen Table via 2D barcode scan
- No internet connection required

Enhance Efficiency

- Fully integrated with IH-Com
- Centralized patient, sample and reagent lot management

Greater Flexibility

- Include pre-treated sample preparations
- Process tests with expired and non-Bio-Rad reagents cells

Educate and Support

- Suggestions for supplementary tests
- Integrates The Blood Group Antigen FactsBook

Ensure Full Traceability

- Electronic archive and automatic result transfer to LIS
- Seamless combination of manual and automated techniques
Main Features
- Fully integrated with IH-Com
- Automated antibody identification
- Upload of Antigen Table via 2D barcode scan
- Antibodies categorized by color and classified by probability
- Suggestions for supplementary tests and sample treatment
- Open to non-Bio-Rad and expired reagent cells
- Complete audit trail of the identification process
