

IH-Complete. Create Your World.

IH-Complete. Create Your World.

Bio-Rad consistently develops innovative products, services and systems designed to satisfy evolving organizational needs and continuing technical challenges in blood transfusion.

Reducing the pressure on staff to deliver safe and accurate results whilst demand for services increases will continue to be a challenge in blood transfusion. **IH-Complete** was designed to satisfy your needs.

With **IH-Complete** you have a large choice from a comprehensive suite of blood group testing instruments, reagents, informatics and services allowing you to decide the optimum set up of your laboratory.

✓ Because Your Staffing Needs are Changing

Nowadays laboratory personnel are expected to satisfy a wide range of demands.

With **IH-Complete** we help you to maximize efficiency by matching test volumes and staffing with automation level.

Walk-away systems with a minimum of hands-on-time

Ready-to-use reagents and diluents

Reduced maintenance time

Streamlined training

✓ Because Productivity is Your Concern

IH-Complete allows you to create your laboratory according to your requirements now and in the future.

You can choose the Automation, Method and Connectivity that meets your needs.

Optimize productivity with **IH-Central** - the connectivity suite at the core of laboratory operations. **IH-Central** is designed by transfusion medicine experts to support safe transfusion through workflow optimization.

Using **IH-Com**, you can manage multiple connected instruments and generate reports containing all of the information that you need to make informed decisions on results for both patient and donor testing. Irrespective of whether you choose manual or fully

automated techniques, long-term storage of data with automated back-up and archive functionality ensures complete traceability of samples, QC, reagents, results and operators.... And because time is precious, **IH-Web** software allows you to validate the results from wherever you are and whenever you want.

BRiCare is your on-demand silent partner for maximizing instrument productivity through 24/7 interactive remote diagnostics and secured support services.

Our LabInsight team, Lean/Six-sigma experts, can support you with tailored services for workflow optimization.

Our solution includes the creation of a personalized layout for improved ergonomics, optimal sample flow and the efficient use of space.

-  Improved processing time
-  Reduced hands-on-time
-  Enhanced security and traceability

✓ Because in Transfusion, Uncertainty is not an Option

With 36 recognized blood groups and at least 390 blood group antigens, details are critical and because incompatibility can be life threatening, bloods types matter. Fortunately, there is a solution, **IH-Complete**.

IH-Complete is the most comprehensive suite of blood group testing reagents and informatics available from a single supplier.

Innovative systems delivering safe and accurate results

Optimized productivity with **IH-Central**, the connectivity suite at the core of immunohematology laboratory operations

Maximized efficiency by matching test volumes and staffing with automation level

✓ Because in Transfusion, Emergency does not Wait

We are continually improving the way to manage emergency situations, providing you with confidence and clarity when you need it most.

Technology innovations to reduce turnaround time

Fully integrated back-up systems

24/7 ready-to-start availability

Intelligent STAT management
