IH-Web Remote Result Management Software

**Be Remote...Stay Connected**

- **Remote**
  Manage transfusion requests and results using your everyday web browser.

- **Result**
  View images, edit results, search previous records and add supplementary tests.

- **Release**
  Validate results and release reports from wherever you are and whenever you want.
Stay Connected

- **IH-Web** is an additional software module for **IH-Com** which enables requests and results to be remotely managed via the internet using a standard web browser.
- **IH-Web** is fully integrated with **IH-Com**; no additional software is required on your computer.

Productivity

- Remote connection can be established anytime, anywhere. **IH-Web** allows the same result verification steps to be performed as in **IH-Com**, irrespective of your relative location.

Traceability

- Complete transfusion request and result management. Result images generated by Bio-Rad instrumentation are clearly presented in **IH-Web** and the full search functionality of **IH-Com** is exploited.

Safety

- Request supplementary tests or repeats.
- Add comments and edit results.
- **IH-Web** provides greater peace of mind through improved patient safety.

Ease of Use

- By implementing the same logic steps and familiar interface of **IH-Com**.
