## Subject: ddPCR diagnostics Product Brand Name change

Dear Valued Customer,

Since the initial launch of Bio-Rad Droplet Digital PCR platform, Bio-Rad has been using QX200<sup>TM</sup> Droplet Digital PCR to identify its systems brand.

As Bio-Rad is expanding the use of its ddPCR platform to in vitro diagnostics (IVD), we have decided to identify the diagnostics product line with the new brand name: **QXDx**<sup>TM</sup>. Hence, we will be updating any current and future diagnostics digital PCR product with the prefix **QXDx**<sup>TM</sup>.

The product name change does not affect the form, fit, or function, or claims of the specific products.

Starting June 15th, 2017, documentation will be updated in a phased process to reflect the **QXDx**<sup>TM</sup> brand name in all diagnostics digital PCR products.

During the transition and until we complete registration of the new name, we will use both the current registered name and the new proprietary name to refer to the instruments and products as shown below:
